for all your filter requirements
Filter Systems

stockists & distributors of filtration products

PROSEP

for all your filtration requirements

Established in 1984 PROSEP Filter Systems Ltd is your **'One Stop Shop'** for filter products. Appointed regional accredited distributor for Parker Process Filtration Division in 1996 we are one of their largest European distributors.

'One Stop Shop'

As an independent specialist, we are your single source supplier of filtration products for almost any application. Bespoke one-off products can be manufactured to suit your exact requirements. From our extensive and purpose built premises, we provide excellent customer service and turnaround times, with over 90% of sales orders satisfied from a stockholding position.

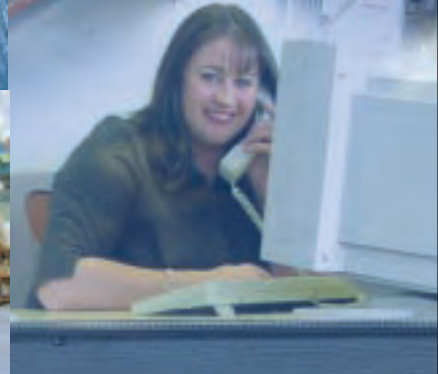

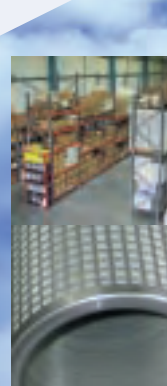

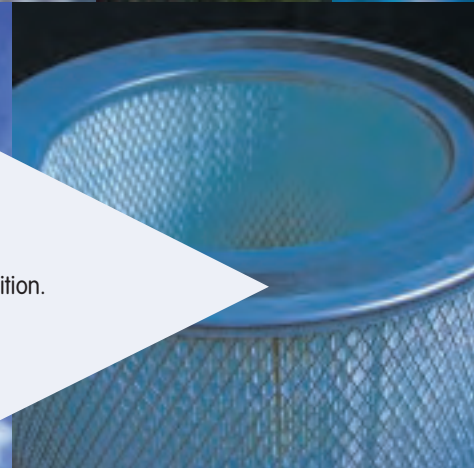

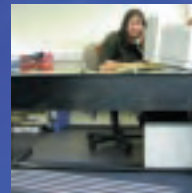

A supply option to suit You - We offer many options to ensure that your specific needs are satisfied, from simple order-supply on demand, to scheduled orders, consignment stocking, right through to controlling stock and providing full responsibility for the stock management of your filtration products. Please contact us as we would be happy to discuss your needs and provide the most effective solution.

INNOVATION, SUPPORT, QUALITY our commitment .. your success!

Here at PROSEP we demand the highest levels of quality and performance.

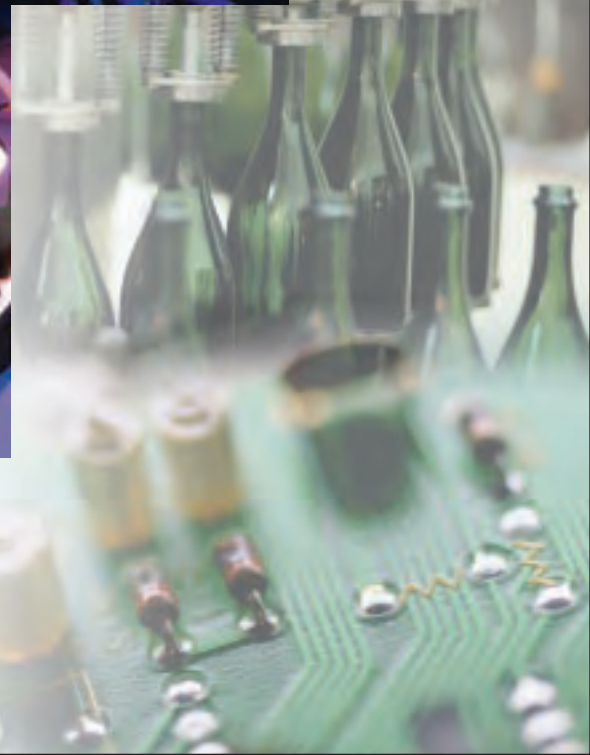

We supply only the most technically advanced filtration equipment produced by some of industry's leading, internationally recognised manufacturers. Because we demand the best, you are assured of the same high standards. Our aim is to provide the right product, at the right price, at the right time.

Part of our service to industry is to offer a complete factory filter survey.

Our association with many of the leading filter manufacturers gives us access to a wide range of filtration products. This enables us to give you expert advice on the best use and application of these products.

Expert product and technical support is only a telephone call away.

In order for you to draw upon our filtration expertise our fully trained Technical Sales Engineers are always on hand to offer guidance and advice, as well as pricing and availability information. Our team of experts can even help you specify the best product for your application, providing you with a complete filtration solution.

Management

As an accredited regional distributor for Parker Process Filtration Division, PROSEP are experienced filtration experts, ready to make recommendations and work with you to improve your entire filtration system. Using Parker Process Filtration products your filtration demands are met with the highest performing, technically advanced, quality filtration systems on the market. We understand your goal to make your process operation better and faster than the competition and reduce your total cost for filtration.

That is why you can count on us for all your filtration requirements.

A ECO-BOND MELT BLOWN DEPTH SERIES

One of the most economical high purity filter cartridges available. The Eco-Bond cartridge provides constant filtration for a wide variety of fluids.

B MEGAFLOW SERIES

High surface area, high flow pleated polypropylene or cellulose filter cartridges provide a cost effective alternative to multi cartridge installations.

C MEGABOND PLUS

High dirt holding capacity cartridge combined with absolute rated filtration.

D PFA SERIES

PFA Fluoropolymer vessels designed for aggressive aqueous chemical filtration.

AIR CONDITIONING & PROCESS GAS FILTRATION . . .

AIR CONDITIONING & DUST EXTRACTION

An important aspect of any working environment is the air that we breathe. Part of our stock program is the supply of replacement air conditioning and dust extraction filters, either replacing with original equipment, alternatives or upgrades.

PROSEP stock a full range of standard size glass and pleated disposable filter panels.

Non-standard sizes are manufactured to order. We also offer a conversion service to replace automatic roll filters with a simple frame system designed to accept bag or panel filters depending upon the application.

PROCESS GAS FILTRATION

Process gas may be described as piped gas which includes compressed air as opposed to ducted supplies. PROSEP stock a wide range of filter elements & filter housings suitable for compressed air and gas sampling. Included within this product range are filters for vacuum applications.

'NO COMPROMISE' A wide range of certified alternative elements are also available, and are certainly 'no compromise' matching the performance of the original equipment. As filtration specialists, the alternative filter element range provides a **'one stop'** source of supply.
