

# PROSEP FILTER SYSTEMS LTD

## F-RO-4 (JG)

### FOUR STAGE REVERSE OSMOSIS SYSTEM

**Four Stage RO System with 75 GPD membrane  
for under £310!!!**

**First stage** - 5 micron sediment filter made of polypropylene spun fibre removes mechanical contaminants in water like sand, rust, silt.

**Second stage** - activated carbon block cartridge removes chlorine and other organic contaminants.

**Third stage** - 75 GPD Reverse Osmosis Membrane eliminates 99.8% of all dissolved substances, as well as algae, bacteria and cysts.

**Forth stage** - post filtration high grade activated carbon filter removes all remaining deposits giving water a natural, pure, spring-water taste.

The filtered water is collected in a patented pressure tank (capacity 15 litres) and then distributed to the user through a separate tap installed directly on the kitchen sink or work-top.

The RO system is fitted with Quick Connectors. Each RO filter is supplied with a full set of accessories and connectors for a quick and easy installation.

**FANTASTIC VALUE FOR MONEY**  
**£306.68 INCL. VAT AND DELIVERY**

**NOW AVAILABLE FROM STOCK**
