

Pleated Coalescing Element

Finite's innovative new pleated micro-glass media eliminates compressor lubricator oils, bulk water and particulate contamination with extremely low pressure drop. With only 18 mbar clean pressure drop, it has an efficiency of 99.5%.

This ASME coalescing filter media has a large surface area, which means long life and a high tolerance for heavy liquid aerosol contamination.

This H-Series 7CVP pleated media has a very low pressure drop and can be used for the removal of bulk liquids and aerosols.

This ASME 7CVP pleated media has a high efficiency and low pressure drop, even when wetted by oil and water.

FEATURES

- High Surface Area
- Fluorocarbon Saturant
- Viton Gaskets
- Robust Design

BENEFITS

- Lower Changeout/Labor Costs
- Low Pressure Drop
- High Dirt Holding Capacity
- Heat and Chemical Resistant
- No Wet Zone
- Oleophobic/Hydrophobic
- High Collapse Strength

Applications

- Particulate Removal
- Oil Removal
- Mist Eliminators
- Dryer OEM's
- Critical Low Pressure Drop Source Air
- Alternative Fuels or Natural Gas Systems
- Water Removal
- Bulk Coalescing
- Filter OEM's
- Desiccant Dryer Pre and After Filter

Part Numbers

H-Series Elements 7CVP (107oC) or 7DVP (204oC)

7CVP25-130 x 1	7DVP25-130 x 1
7CVP25-187 x 1	7DVP25-187 x 1
7CVP25-235 x 1	7DVP25-235 x 1
7CVP35-280 x 1	7DVP35-280 x 1

ASME Elements 7CVP (107oC) or 7DVP (204oC)

7CVP51-280 x 1	7DVP51-280 x 1
7CVP85-250 x 1	7DVP85-250 x 1
7CVP85-360 x 1	7DVP85-360 x 1

Note: H-Series Elements are available for H-Series 1 1/4" port and above. Elements are sold one per box.
