Pump Protection Strainer

The *pump protection strainer* is designed specifically to remove potentially damaging debris before it passes through the pump. However it is now widely used as a strainer for coarse particles from product lines.

Manufactured entirely from 316 stainless steel, polished to food grade inside and out. It is designed to fit into confined spaces and also for ease of cleaning and changing elements.

- Manufactured in house from 316 stainless steel to strict standards within the ISO 9002 controls
- 1mm hole elements and above are metal to metal seal with no 'O' ring.
- No tools required for dismantling.
- Hole sizes in stock 1mm, 1.5mm, 3mm and 10mm (*other hole sizes to order*).
- Suitable for c.i.p. and s.i.p.
- Sturdy elements for reverse flushing.
- Standard finish 240 pol OD, pol ID. Other finishes available on request.
- From stock 1½", 2" and 3" exits, plain ended. Element to be specified. Other sizes and thread types available on request.
- Competitively priced.
