AQUA BRAVOMAX

Aqua BravoMax

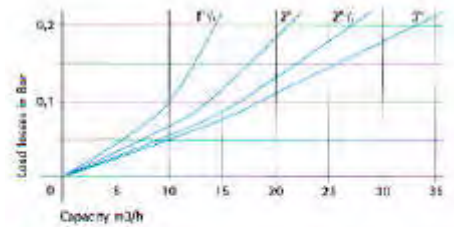

The Aqua **BravoMax** filter is made entirely of hot-painted stainless steel, with a filtering element made of Aisi 304 stainless steel. In filters 150-200 microns.

During cleaning, the filter is brushed by a rotating system that simultaneously removes refuse. The wash operation is carried out manually in the semi-automatic filters, and automatically in the automatic filter.

Semi-automatic BravoMax - To wash the cartridge, turn the knob on top of the filter.

Automatic BravoMax - An electronic system washes the cartridge according to pre-set times and/or using a differential that shows the degree of clogging in the cartridge.

BravoMax must be installed with a by-pass and a visible discharge. For the automatic model, an electrical outlet is necessary
