

120 RMAM

The 120RMAM fuel filter/water separator features 1/4"-18 NPTF inlet and outlet fuel ports and a unitized mounting bracket for mounting versatility. It also features an Aquabloc II replacement element that repels water and removes solid contamination down to 2 micron. This rugged, compact filter assembly fits a variety of engine applications and comes with the peace-of-mind you've learned to expect from Racor filters. Experienced sailors trust their engines, their livelihood, and even their lives to Racor. Shouldn't you?

An optional UL Recognized petcock drain valve is also available to aid in the removal of water and contaminants. See Marine Accessories section.
