

Racor ParFit™ for Watermakers

The Racor Village Marine line of pleated filters are designed for the reverse osmosis industry and are superior to spiral wound or polyspun cartridges to give you a longer filter life as well as increasing flow rates and keeping cartridge size down.

Racor Village Marine thin film composite reverse osmosis membranes deliver high salt rejection while maintaining high production rates to obtain the fresh water production needed by customers.

By selecting the highest grade of materials and thoroughly testing performance, Racor is able to offer high quality pleated filters and reverse osmosis membrane products for all watermaker brands.

Problem:

- Users of competitive watermakers may have difficulty locating a source for replacement filters and membranes.
- Users may have been supplied with inferior spiral wound or polyspun cartridges and can upgrade to Racor.

Solution:

- Racor Village Marine can provide you with the highest quality replacements parts for almost any make or model watermaker unit. Enjoy peace of mind by using genuine Parker Racor filters and membranes in your watermaker.

ENGINEERING YOUR SUCCESS.

Parker Parfit
